FURNITURE HARDWARE

13TH EDITION

TURNSTYLE
DESIGNS

MADE IN ENGLAND

‘The details are not the details, they make the design.’

Charles Eames

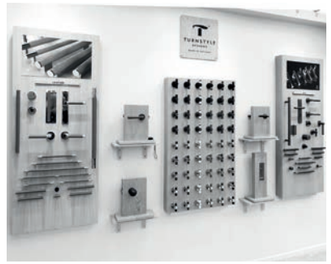

Turnstyle Designs was founded in 1992 by Steve Roberts. The company, family owned and run, is now one of the regions largest employers and operates out of its own purpose-built factory in Barnstaple. Employing a wealth of talent from craftsmen, engineers and an excellent sales team, who all take great pride in producing and delivering some of the worlds finest door and cabinet hardware.

Turnstyle produce a broad palette of products, using a wide choice of materials including hand stitched leather, machined and hammered brass ware, as well as its own composite called Amalfine™. Turnstyle also use a range of custom materials including glass, shell and timber.

Turnstyle is proud to have supplied luxury hardware to many prestigious projects over the years, including luxury yachts, private residences, hotels and private clubs. From the eight stitches per inch to the cotton sleeve every handle is delivered in, attention to detail runs through the veins of the company in every aspect of business. The pride in producing each product is evident in its quality of design and service.

As proud winners of The Queens Award for Export, Turnstyle export over 75% of it business to dealer partners in over 30 countries around the world.

Environmental Ethos

Sustainability is a part of the Turnstyle DNA and we strive to be continually responsible with the materials we use, how we deal with waste and reducing our carbon footprint.

We have removed 99% of single use plastics from our packaging and replaced them with fast and completely biodegradable alternatives. We operate from a highly insulated factory and offices, using our own solar energy source. We recycle everything where possible, including canteen waste.

Even our materials are environmentally conscious, such as our leather which is tanned with natural vegetable dyes sourced from Italy. Our trademark Amalfine™ material is also made up of a composite blend, which includes by-products such as marble dust. Best of all we make our handles to last, strongly believing that if you buy well there is only a need to buy once.

We are working hard with all our staff to cut down air-travel, and endeavour to replace as many face to face meetings as we can with online sales and training sessions. Our ‘Bike to Work’ incentive scheme offers team members the opportunity to reduce their carbon emissions, while keeping fit and all our in-house food ordering is organic and locally produced.

With donations for tree preservation and planting, we have offset our carbon footprint three-fold, making us carbon negative. As proud members of ‘1% for the planet’, we donate 1% or more of our annual turnover to environmental causes and organisations.

MADE IN BRITAIN

Finishes

Living finishes

Living finishes are designed to change with time and use. Brass components are polished and then treated in a number of different ways to change the surface, either by accelerated ageing as with the Vintage and Burnished finishes or brushing as with our Satin Brass.

All living finishes are finished with a highly durable wax, which will wear according to use, we do not use Lacquer, so as to avoid uneven blotchy wear.

Brass living finishes can be used outdoors, but will be subject to the specific atmosphere of the location and change accordingly.

Brass Living

Polished Brass (PU)

Solid brass, expertly polished to a high sheen, pure and simple with nothing added to allow the natural aging process or keep it polished with any good brass cleaning products. LV-EXT

Vintage Patina (VP)

Hand polished brass base, matt treatment before patinated to a rich dark brown, lightly distressed for highlights. Finished with a durable wax coating. LV-EXT

Fine Antique Brass (FA)

Hand polished brass, lightly patinated and brushed to highlight and contrast. Finished with a durable wax coating. LV-EXT

Satin Brass (TW)

Hand polished , then wire brushed for a golden finish. Wax coated. This finish will darken with age unless kept polished. LV-INT

Vintage Nickel (VN)

Nickel plated brass, skilfully patinated by our team of craftsmen, followed by hand distressing and wax polishing. LV-INT

Brass Plated

Bright Chrome (BC)

Sometimes referred to as Polished Chrome, solid brass base, highly polished, nickel base coat with a durable chrome top coat. Easy to maintain and our most durable finish. PL-EXT

Polished Nickel (PN)

Solid brass base, finished with our beautifully subtle nickel plating, silver with hints of yellow. Superb in contemporary or traditional interiors. Clean with any quality nickel polish. PL-INT

Satin Nickel (SN)

Still our most popular plated finish, solid brass with a fantastic, flat satin nickel plating, no brushwork. A superbly versatile finish that will stand the test of time. PL-INT

Matt Black Chrome (CB)

Our latest addition to our plated finishes, a four step process developed by our highly skilled team of finishers, this is a completely matt black plated finish. Highly durable and practical for interior or exterior use. PL-EXT

Hammered Living

Polished Brass (PU)

Solid brass, expertly polished, then hammered and polished a second time to a high sheen, with subtle light refraction. Either allow the natural aging process or keep it polished with any good brass cleaning products. LV-EXT

Burnished Brass (BH)

For our hammered finishes we use a more gentle technique to patinate, each piece is hand burnished to break the surface before being patinated, then subtly distressed, hand polished and waxed to give a luxurious antique finish, highlighting every hammer blow perfectly. LV- EXT

Burnished Nickel (NH)

Polished solid brass, individually hammered, then nickel plated before being hand burnished, patinated and distressed to be finished with a wax finish. Eight pairs of hands before assembly, QA and packing. LV-INT

Hammered Plated

Bright Chrome (BC)

Solid brass hand polished then individually hammered, before plated with a crisp and bright chrome plating. Highly reflective hammer blow texture that is easy to maintain and our most durable finish. PL-EXT

Polished Nickel (PN)

As with Chrome, solid brass , polished, hammered and re polished before being finished with our beautifully subtle nickel plating. Superb in contemporary or traditional interiors. Clean with any quality nickel polish. PL- INT

Satin Nickel (SN)

Solid brass, polished, individually hammered a thousand times, and finished with a fantastic, flat satin nickel plating, no brushwork. A superbly versatile finish that will stand the test of time. PL-INT

Code: LV - living finish. INT - interior use only. EXT - interior or exterior use. PL - plated finish

Button Finishes

Satin Chrome (SC)

Only available on full leather cabinet handles such as Bow, Cup and Strap as button finishes.

Antique Bronze (AB)

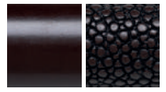

Only available on full leather cabinet handles such as Bow, Cup and Strap as button finishes.

Button finishes also available in BC, SN, PN, PU, FA

Amalfine™

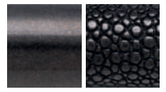

Warm to the touch, tactile and incredibly detailed, our Amalfine™ finishes are also extremely durable and maintenance free. Each design and pattern translates differently according to the finish, see our website to view all designs in all finishes.
Please note Amalfine™ designs are recommended for interior use only.

Amalfine™

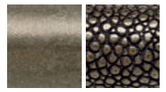

Cocoa (CO)

Dyed marble composite, plain designs reminiscent of mid century Bakelite.

Black Bronze (BB)

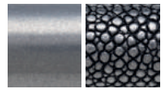

Dyed marble mixed with real bronze, highly polished to bring out the bronze highlights, a rich black that will go well in any interior.

Silver Bronze (SB)

Heavily loaded cold cast bronze, highly polished and waxed to produce a rich dark golden finish.

Amalfine™

Alupewt (AP)

A secret blend of composite metals, polished and dyed to bring out the highlights in the more detailed designs such as Shagreen.

Sand (SA)

Only available with specific designs such as Shagreen, Labyrinth, Hickory and Bullet.
Dyed marble, with a dark stain to produce a highly unique finish.

Bone (BN)

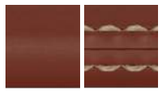

Made to order only, and only applicable to non textured designs.

Leather

Tan (TA)

Light, luxurious leather, edged with a soft, natural thread.

Chestnut (CN)

A glorious, reddy, nutty brown, full of life and finished with a natural thread.

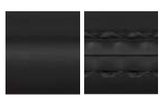

Chocolate (CT)

A rich dark brown, our most popular colour, finished with a dark brown thread.

Slate (GC)

A mid tone grey, growing in popularity, great with our silver plated finishes and edged with a silver grey thread.

Black (BL)

A beautiful, subtle sheen, classic leather, finished with a black thread.

White (BW)

White leather, white thread, white edging for a clean and contemporary look.

Woven Leather

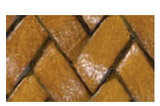

Tobacco (TC)

A reddish brown mix of woven strands to produce our best selling classic.

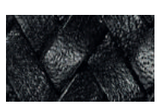

Flint Grey (FG)

A beautiful mid grey with a subtle dark smoked undertone.

Whisky (WK)

A light tan mix with dark edging.

Raven Black (RV)

Like the bird, a beautiful reflective black sheen, that comes alive as light catches it.

Leather like all natural materials will change with age, according to the situation, exposure to sunlight and usage (or lack of). The more you use it, the better it looks, the oils from your hands feed the leather and create a unique patina. Leather handles should only be used internally. Please see our leather care instructions for maintenance and cleaning.

Colour Variation

Vegetable tanning is an art rather than a science, please allow for slight variations in colour from batch to batch, this is all part of the charm of using such a beautiful and natural material.

Faux Leather

Available on Flush products only

Attache Cognac (AC)

A colour match to our Chestnut Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Black Tea (BT)

A colour match to our Chocolate Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Finesse Black (FB)

A colour match to our Black Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Destiny Storm (TS)

A colour match to our Slate Grey Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Design Your Handle

Select and filter your design, finishes or sizes using our website tool.

We are proud to have one of the most progressive websites in our industry, with a simple to use configuration tool which allows you to view every one of our designs in every combination of grip and body, leather, Amalfine™ and brass.

Choose your design, finish and size, download the specification sheet and then request your pricing. Our sales team will then send you a quote and tell you how to buy.

You can also keep up to date on our latest news, developments, events and dealerships, as well as read our blog where you will find interesting posts about what we are up to as a business and team.

Amalfine™ manufacturing

Amalfine™ is a composite blend which has become one of our trademarks and is entirely unique to Turnstyle.

Incredibly versatile and durable, each piece is hand cast, finished and will pass through at least eight pairs of hands before finally being packed for dispatch. Every piece is unique with its own individually crafted character and charm.

The finishes in the Amalfine™ range are more like materials than finishes, the colour runs throughout the design so unlike a surface finish it cannot wear off.

Using highly flexible silicone rubber moulds we are able to reproduce finger print detail from the masters we cast from and de-mould the parts without a seam.

After de-moulding, each design is carefully machined down to remove excess material and where applicable to accurately fit its brass partner.

After around six to eight hours of various polishing stages the beautiful lustre will remain for many years to come.

Every piece is unique with its own individually crafted character and charm.

Turnstyle also offer a Custom Casting and finishing service. For better understanding of the process visit our website and view the production movies **www.turnstyledesigns.com**

goose neck combination Amalfine™ D Handles

Hand cast Amalfine™ grips in seven diverse designs, available in five different Amalfine™ finishes with our nine beautiful metal finishes. These D handles can be made with single or double grips and co-ordinate with matching door levers and pull designs.

Solid Brass

Turnstyle uses a host of manufacturing processes to produce the very best result for each design and product. These include CNC machining, turning, milling, forging, investment casting and extrusion. All carried out by highly skilled precision engineers.

A selection of our Solid designs are available with our hammered texture applied. Every design is individually hammered with up to a thousand hammer blows per grip, each handle is made to order and completely unique. Whatever finish you wish to apply, our Hammered range is a luxurious option and versatile enough to work in any interior.

goose neck solid and hammered cabinet handles

Our range of simple, solid cabinet handles are turned and milled from solid brass, hand polished, finished and assembled. See our website or Door Hardware Brochure for co-ordinating door and window handles.
The hammered cabinet handles, again from solid brass, are individually hammered to produce luxurious hardware custom made for you.
Shown here in Satin Nickel.

Shown here – **A variety of Recess Leather (stitch out) Scroll Cabinet handles in Chestnut Leather with Polished Nickel**

Leather manufacturing

Our leather is sourced from some of the finest tanneries in the world in Tuscany, Italy. We use only the very best full grained (top and strongest section), vegetable tanned (all natural), drum dyed, bridle or saddle leather.

Leather like all natural materials will change with age, according to the situation, exposure to sunlight and usage or lack of. The more you use it, the better it looks, the oils from your hands feed the leather and create a unique patina. Like an old handbag or briefcase the character of the leather gets richer with age.

Colour Variation

Vegetable tanning is an art rather than a science, please allow for some variations in colour from batch to batch and even from hide to hide in some cases. This is all part of the charm of using such a beautiful and natural material.

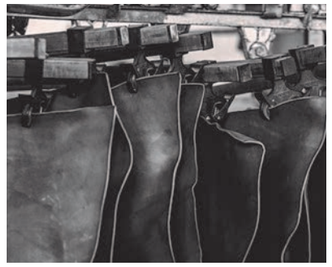

Wear and Care

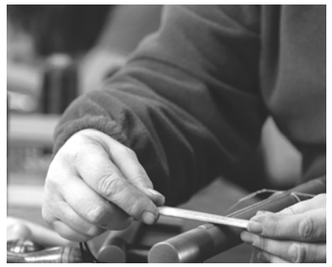

As with a good handbag or pair of shoes the leather will appreciate being fed from time to time, we recommend twice a year with a good quality leather cream, or we can supply a recommended cream if you wish.

Do not clean with solvents or chemicals, as this will not only affect the leather but also soak through and destroy the glue. Scratches and dents can be removed by a simple “boning” process that brings the oils back to the surface and repairs by simply working the leather area in circular motions with a boning tool (or the back of a spoon).

If the leather gets dirty use a small amount of soapy water, let it dry and finish with a natural wax. Try and remove dust if the handles are not being used, as dust dries out the leather.

With a small amount of care your handles will last for years and years to come.

customisation

Modify

We offer modification and customisation options for clients by using existing stock components.

A cost effective way to enable a client to have a unique, bespoke design by using some of Turnstyles' stocked components and modifying material, grips or finish and thereby benefiting from both price and delivery times.

There are several ways of achieving this... here are the main areas:

Custom Leather

Clients can free issue their leather to apply to an existing design or modify our stitch colour or style.

Custom Grip

Create your own grip for any of our hardware, and choose your own materials and lengths.

Custom Metal

Alongside our standard metals we have a range of custom finish options including Rose Gold, Vintage Copper and Silver Plate.

Tailored

If you are not able to find something to suit your project in either of our catalogue ranges or via the Modify process we will be happy to discuss developing and manufacturing your vision from start to finish. We have the capabilities and

know-how to manufacture most types of door hardware, however complex, and have been the manufacturer of choice for some of the most prestigious and demanding clients in the world, including a number of Superyacht builders.

We understand the demands put on door and cabinet hardware and will ensure that your design not only looks a million dollars but it is also built to last and function smoothly.

In the first instance please contact our custom design department at our head office and ask for Alex Foster on
+ 44 (0)1271 325 325 or email alex@turnstyledesigns.com. Alex will discuss the project, designs and suitability (to develop time scales and budget indications) from prototyping to full delivery.
